Sy Truong

MyGithub – *My Porfolio* – *syytruong@gmail.com, (+358)468-800-514*

EDUCATION	**Metropolia University of Applied Sciences**	*Espoo, Finland*
	Bachelor of Engineering	*From Sep-2016*
	Major Software Engineering	

EXPERIENCE

NFQ ASIA   **10.2019 – 10.2020**

Software Engineering (Angular, React)   *HCM, Vietnam*

Continue developed the application using Angular. Implement the interface for employees to login, apply for leave, … using React. In this period, I learn how to create a Single Sign On server from my tech leader; and implementation payment feature while helping another team in the company during their shortage of human resource.

NFQ ASIA (Internship)   **03.2019 – 09.2019**

Full stack Developer (Angular)   *HCM, Vietnam*

My tasks were element new features as well as fixing bugs and writing unit test in both Front-end and Back-end side. I also made introduction video for releasing new features and used Nest.Js to to document the APIs instead of using SwaggerHub. In this job, I suggested to refactor a feature that was highly appreciated and approved by the PM and the customer
